

WHAT IS NEW WITH EVBOX LIVO 2

EVBox Solar Charging

By combining EVBox Livo 2 with our Dynamic Load Balancing kit, our customers can take more **control** over their solar charging and **save** on their energy bill.

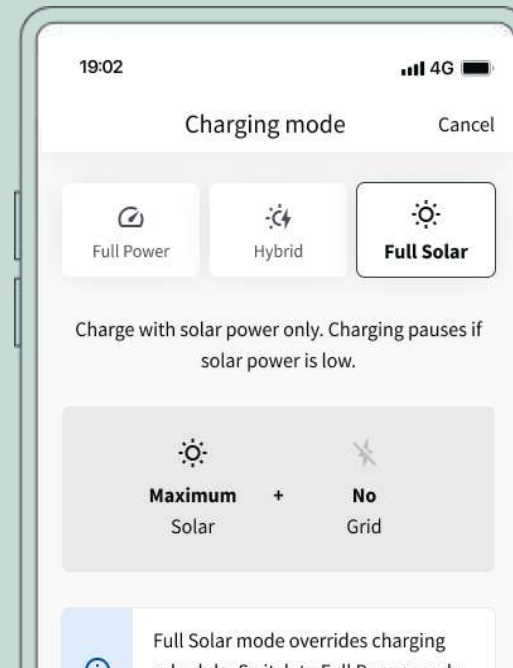

Independent of solar inverter type for full flexibility.

DLB kit with wired connection for high reliable, independent of the type of power meter

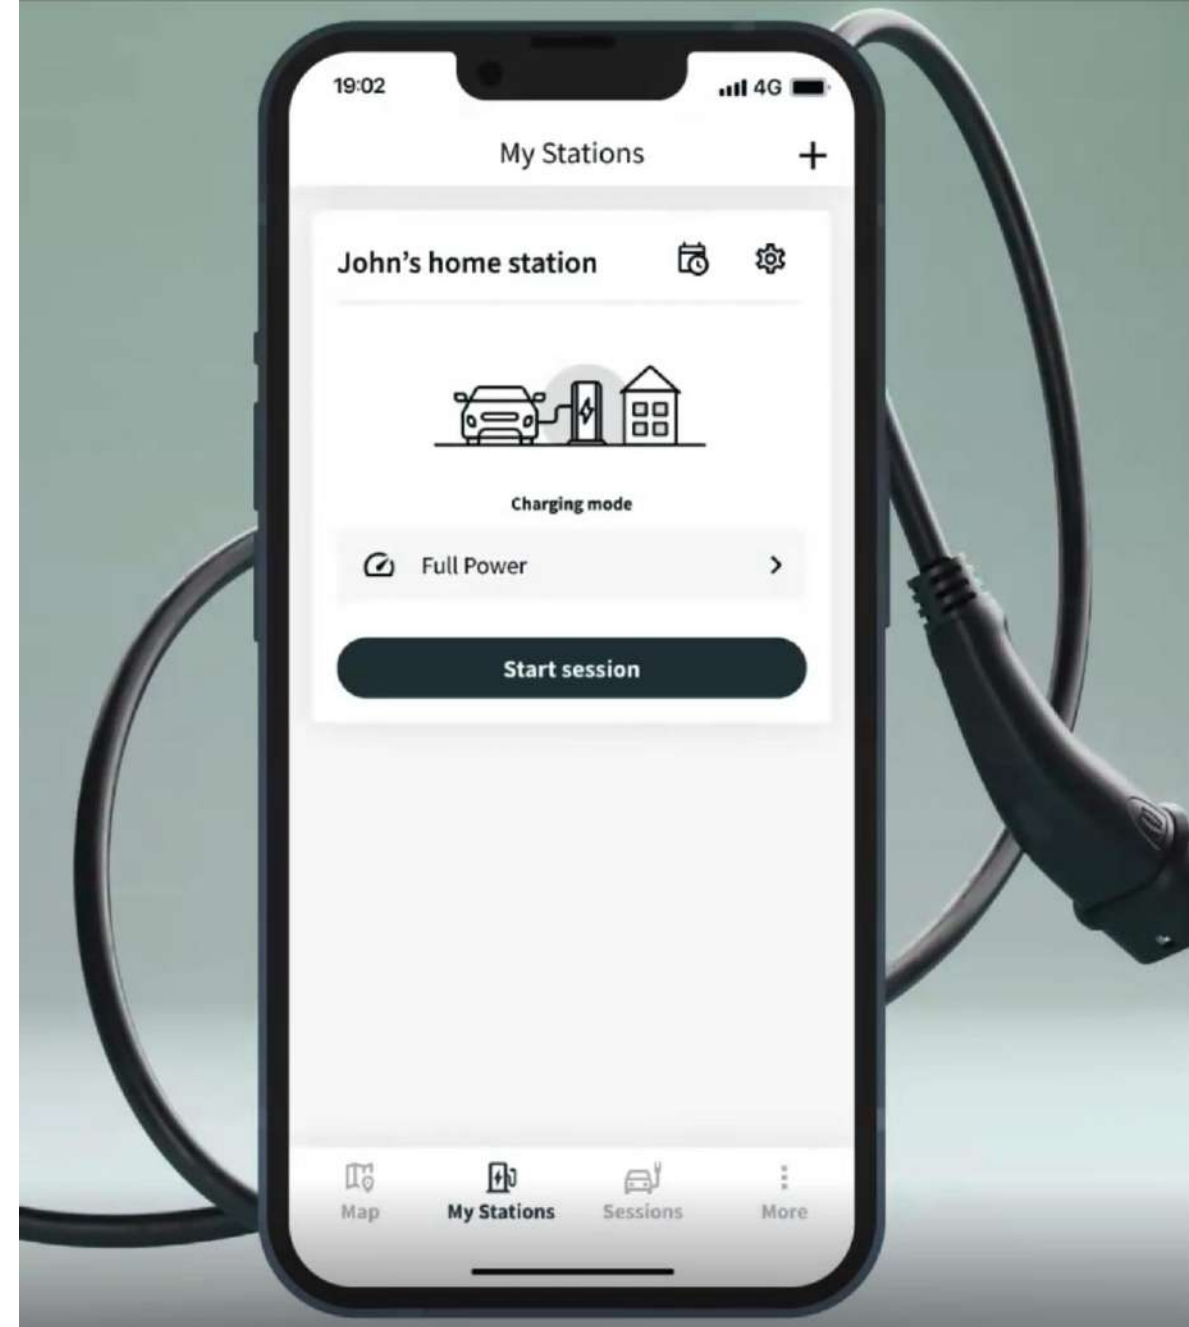

Easy setup with three different charging modes to tailor to different needs.

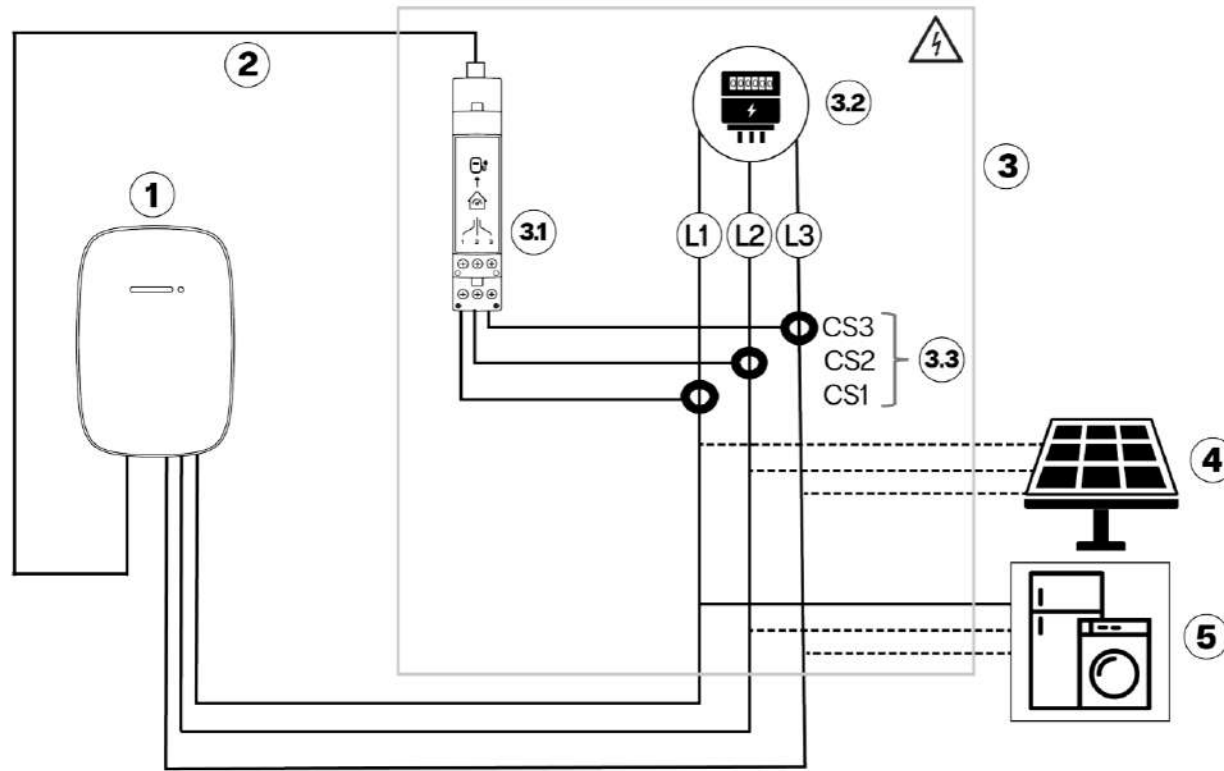

Three charging modes to choose from

Using our EVBox Everon app, an EV driver can alternate between **three different charging modes** depending on their needs. See our modes available:

How all the elements work together in more detail

- 1. Charging station
- 2. Ethernet cable
- 3. Power supply cabinet
- 3.1 DLB adapter

- 3.2 kWh meter
- 3.3. Current sensors
- 4. Solar power system
- 5. Home appliances
